PERSONAL PROJECTS

Mini projects using HTML , CSS and JavaScript(Stone paper scissor game, Tic-Tac-Toe game,Portfolio)

- HTML, CSS, and JavaScript are the three core technologies for building web pages and web applications. **HTML** contains the structure of the project.**CSS** file contains the styling of the application..**JavaScript** file contains the logic of the game.

Research Paper on Drowsiness detection system using eye tracking published on scopus

- A drowsiness detection system using eye tracking is a technology designed to monitor and analyze a person's eye movements to determine their level of alertness and likelihood of falling asleep. By tracking factors such as blink rate, eyelid closure duration, and eye movement patterns, the system can identify signs of drowsiness in real-time.(python ,ML)
